ABOUT ME

Technology enthusiast and Full Stack developer with a deep-seated passion for automation and Artificial Intelligence. Specialized in building production-ready systems that streamline workflows, optimize processing performance, and seamlessly integrate computer vision and intelligent capabilities into responsive web architectures.

TECHNICAL SKILLS

Languages: C, Python, Java, JavaScript (ES6+), SQL

Specializations: Data Structures & Algorithms (DSA), AI & Computer Vision

Backend Stack: Node.js, Express.js, Firebase Authentication, Cloud Functions, REST APIs

Frontend Stack: HTML5, CSS3, Vanilla JS, UI/UX Design, Responsive Layouts

Database & Cloud: Firestore Database (NoSQL), Firebase Cloud Storage, DBMS Principles

Tools & APIs: TensorFlow MoveNet, OpenCV, Pandas, Tkinter, Razorpay API, Git, GitHub, VS Code, Postman

PROJECTS

Real-Time Posture Detection and Notification System

2026

Python, TensorFlow MoveNet, OpenCV, Pandas, Tkinter

Project Link: github.com/pujithab27/Posture-Detection

- **Engineered** an AI computer vision system using TensorFlow MoveNet and OpenCV for real-time human pose estimation.
- **Programmed** algorithmic logic using shoulder, hip, and knee keypoints to compute posture angles and identify misalignment.
- **Designed** automated desktop alerts and integrated email reporting to send tracking metrics directly to users.
- **Developed** a data logging system using Pandas to record real-time posture coordinates and alert statistics for trends.

LendeX – Peer-to-Peer Rental Marketplace

2025

Node.js, Express.js, Firebase, Razorpay API

Project Link: github.com/pujithab27/LendeX

- **Architected** a peer-to-peer marketplace application using Node.js and Express.js to automate operational workflows.
- **Implemented** Firebase Authentication for secure identity checks and Firestore NoSQL data stores for live rental item tracking.
- **Integrated** Razorpay API payment infrastructure to safely handle transactions and dispatch automated customer receipts.

MomFoods – Home-made Pickles & Spices Store

2025

HTML5, CSS3, JavaScript

Project Link: github.com/pujithab27/html-css-project

- **Developed** a fully responsive e-commerce web store interface using semantic HTML5 structures and modern CSS3 layout styling.
- **Optimized** front-end code configuration structures to guarantee a 90+ rating score across core website accessibility indices.

EDUCATION

Vishnu Institute of Technology

2024 – 2028

Bachelor of Technology in Information Technology (IT) • Bhimavaram, AP • CGPA: 9.29 / 10.00

NKR Junior College

2022 – 2024

Intermediate (MPC) • Repalle, AP • Score: 95.7% (College Topper)

Bhashyam High School

2022

Secondary School Certificate (SSC) • Repalle, AP • Grade Score: 62.8%

ACHIEVEMENTS & CORE COMPETENCIES

- **Continuous Learning:** Extensively mastering advanced Data Structures & Algorithms (DSA) along with Generative AI workflows.
- **Athletics:** Zonal Level Kho-Kho Player; recognized for outstanding agility, tactical strategy, and collaborative teamwork.
- **Soft Skills:** Critical Problem Solving, Collaborative Teamwork, Strategic Communication, Adaptability, Technical Leadership.
