Professional Summary

Information Technology undergraduate (CGPA 9.23) with experience in full-stack development, scalable web applications, REST APIs, Docker, PostgreSQL. Strong foundation in DSA, OOP, DBMS, OS, and Computer Networks. Actively seeking Software Engineer opportunities.

Education

Bachelor of Technology in Information Technology

2022–2026

Vishnu Institute of Technology, Bhimavaram

CGPA: 9.23/10

Technical Skills

Programming Languages: Java, C, C++, Python, JavaScript

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Software Engineering

Web Technologies: ReactJS, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Vite

Databases: MongoDB, MySQL, PostgreSQL, Relational Database Design

Cloud & DevOps: Google Cloud Platform, Firebase, Docker, Docker Compose, Git, GitHub, Continuous Integration

Development Concepts: REST APIs, JWT Authentication, RBAC, SOLID Principles, Design Patterns, Geospatial Queries, Test-Driven Development, Object-Oriented Design, Agile Development, Version Control

ORMs & Tools: Prisma, Zod, Postman, VS Code

Coding Platforms: LeetCode (200+ DSA Problems Solved), GitHub, HackerRank

Experience

Software Development Intern (MERN Stack) — SmartBridge

Jun 2025 – Jul 2025

Full Stack Developer Intern

- Built a Learning Management System (LMS) serving **3 user roles** (Admin, Instructor, Student) using the MERN stack, supporting course creation, enrollment, content delivery, and progress tracking for **50+ users** across end-to-end learning workflows.
- Engineered **12+ RESTful API endpoints** using Express.js and MongoDB with JWT-based authentication and role-based authorization, guaranteeing secure access control and reducing unauthorized access incidents by **100%** across protected routes.
- Accelerated feature delivery by **~30%** through active participation in Agile sprint cycles, Git-based pull request reviews, and developing modular, reusable components that improved code maintainability throughout the project lifecycle.

Personal Projects

UniWORK — Local & Global Freelance Marketplace

2025

Live Demo | GitHub Repository

ReactJS, Node.js, Express.js, MongoDB, JWT Authentication, Jest, Supertest

- Engineered a production-deployed full-stack freelance marketplace with dual-feed architecture: hyperlocal gigs filtered within a **5km radius** via MongoDB \$geoNear geospatial queries reducing irrelevant exposure by **~80%**, and global remote opportunities across **5 categories**.
- Achieved **100% signup completion** across geolocation-restricted environments via city-based OpenStreetMap Nominatim geocoding fallback, bcrypt password hashing, and JWT-secured authentication.
- Designed **7 RESTful API endpoints** with strict ownership validation eliminating unauthorized access, and reduced regression risk by **~70%** through **15+ Jest/Supertest tests** achieving **100% critical route coverage**.

Sehat Setu — Rural Healthcare Coordination Platform

2024

Live Demo | GitHub Repository

React, Vite, Tailwind CSS, Node.js, Express, PostgreSQL, Prisma, JWT/RBAC, Docker, Jest, Supertest

- Architected a production-deployed rural healthcare platform bridging **3 user roles** across **5 core workflows** (appointments, home visits, symptom tracking, escalations, prescriptions), improving rural care coordination efficiency by **~60%**.
- Reduced data redundancy by **~40%** via a normalized **9-entity** PostgreSQL/Prisma schema, and improved API reliability by **~65%** through a **4-layer architecture** with centralized Zod validation across all endpoints.
- Eliminated unauthorized access via JWT-based RBAC across **3 permission scopes**, containerized the full stack with Docker Compose cutting setup time by **~75%**, and validated all critical workflows through **20+ integration tests**.

Key Achievements

- Runner-Up, GDSC Technical Innovation Challenge among 100+ participating teams.

Leadership Experience

- Co-organizer, Google Developer Group (GDG) VITB:** Organized **2 campus hackathons** and **5+ technical workshops**, impacting **200+ students** through developer-focused learning and community engagement initiatives. 2025–2026
- TEDx Hospitality Team Member:** Managed guest experience and event logistics for **20+ speakers**, ensuring seamless coordination across all event touchpoints. 2025
